Re: Unauthorized Mining Activities, Stone Quarry, S/039/007, Sanpete County, Utah

Dear Mr. Hansen:

It has come to the attention of the Division that you are operating a stone quarry in the Five Mile Pass area of Sanpete County (the Utah Division of Wildlife Resources [DWR] is surface owner). Rule 647-1. et seq. of the Utah Mined Land Reclamation Act of 1975, Title 40-8, et seq., Utah Code Annotated, requires that all mining activities be properly permitted with this Division and related agencies *before* commencing mining activities.

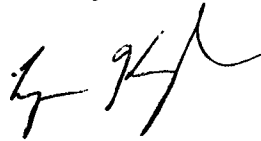

For your convenience, I have enclosed a copy of the rules as well as the application forms for filing a Notice of Intent to Conduct Small Mining Operations (MR-SMO) and Notice of Intent to Conduct Large Mining Operations (MR-LMO). If the total surface disturbance is less than 5 acres (including roads), you will need to submit the MR-SMO form. If surface disturbance does or will exceed 5 acres, then you will need to submit the MR-LMO form. Please note, the disturbed area includes all areas that are disturbed for the exploration, development and extraction of a mineral deposit, including, but not limited to: surface mining and the surface effects of underground and in situ mining; on-site transportation (roads); concentrating; milling; evaporation; and other primary processing (R647-1-106.). Please complete the appropriate application form and submit it to the Division no later than August 1, 1994.

Large mining operations are required to post a reclamation surety with this Division. The surety amount is based upon projected costs to reclaim the mine disturbance after mining has ceased. Small mining operations do not have to post a reclamation surety with this Division. Your failure to immediately file the appropriate permit application form may result in subsequent enforcement action being initiated by this office.
